

NUMU Dashboard - Frontend 2-Week Sprint

Phase 1: Fix All Dead-End Buttons | Yousef & Yahia

Tech Stack: React 18 + MUI 5 + Redux Toolkit / RTK Query + React Router v5 + Vite

Team:

- Yousef - Shared UI systems (Snackbar, ConfirmDialog, Export) + Product CRUD forms
- Yahia - Order detail + Customer detail + Routes + Dashboard cleanup

WEEK 1: Product CRUD Form + Global Feedback System

Current State: Products list EXISTS (table, search, pagination) | No create/edit form | No global snackbar | 5x window.alert() calls | Delete via menu (no confirm dialog) | Export buttons are stubs | RTK Query hooks exist: useCreateProductMutation, useUpdateProductMutation, useDeleteProductMutation

Yousef - Shared UI + Product Forms

#	Task	Files to Create / Modify
1	Create SnackbarProvider context: queue-based, auto-dismiss (5s), position bottom-left, success/error/warning/info variants, useSnackbar() hook	src/context/SnackbarContext.js, src/components/GlobalSnackbar/index.js
2	Wrap App with SnackbarProvider + replace all 5 window.alert() calls with useSnackbar() across sign-up, products, profile pages	src/App.js (modify), src/layouts/authentication/sign-up/ (modify), src/layouts/products/ (modify), src/layouts/profile/ (modify)
3	Create reusable ConfirmDialog component: MUI Dialog with title, message, cancel/confirm buttons, loading state, destructive variant (red button)	src/components/ConfirmDialog/index.js
4	Create reusable CSV export utility: exportToCSV(data, columns, filename) + integrate into Products page export button	src/utills/exportCSV.js, src/layouts/products/index.js (modify)
5	Create ProductForm component: full-page form with sections (Basic Info, Pricing, Inventory, Media, Organization). Fields: name, description, SKU, price, compare-at-price, cost, quantity, category select, tags, status (draft/active/archived)	src/layouts/products/components/ProductForm/index.js
6	Create ProductCreate page: uses ProductForm, wires to useCreateProductMutation, snackbar on success/error, redirect to /products on save	src/layouts/products/create/index.js
7	Create ProductEdit page: same ProductForm pre-filled via useGetProductQuery, wires to useUpdateProductMutation, snackbar feedback	src/layouts/products/edit/index.js
8	Create ProductDuplicate: same form pre-filled but no ID (creates new), triggered from products list menu action 'Duplicate'	src/layouts/products/duplicate/index.js, src/layouts/products/index.js (modify menu)

Yahia - Order Detail + Customer Detail

#	Task	Files to Create / Modify
1	Create OrderDetail page/side-panel: header (order #, date, status badge), customer info with link, action buttons (update status, cancel, refund)	src/layouts/orders/detail/index.js
2	OrderDetail: line items table (product image, name, SKU, qty, unit price, line total) + pricing summary (subtotal, shipping, 14% VAT, discount, total EGP)	src/layouts/orders/detail/components/Lineltems.js, src/layouts/orders/detail/components/PricingSummary.js
3	OrderDetail: shipping address with governorate, payment info (method COD/Paymob/Card, status, transaction ID), internal notes section	src/layouts/orders/detail/components/ShippingInfo.js, src/layouts/orders/detail/components/PaymentInfo.js, src/layouts/orders/detail/components/OrderNotes.js

#	Task	Files to Create / Modify
4	OrderDetail: status update dropdown (enforce valid transitions: PENDING->CONFIRMED->PROCESSING->SHIPPED->DELIVERED), wire to useUpdateOrderStatusMutation	src/layouts/orders/detail/components/StatusUpdater.js
5	Create CustomerDetail page/side-panel: customer info (name, email, phone, addresses), order history list filtered by customer_id	src/layouts/customers/detail/index.js
6	CustomerDetail: stats cards (total spent, total orders, average order value, member since), wire to useGetCustomerQuery	src/layouts/customers/detail/components/CustomerStats.js
7	Create CustomerCreate form: fields (first name, last name, email, phone, address), wire to useCreateCustomerMutation, snackbar on success	src/layouts/customers/create/index.js
8	Wire order list 'View' button to OrderDetail + wire customer list click to CustomerDetail + add navigation links between them	src/layouts/orders/index.js (modify), src/layouts/customers/index.js (modify)

WEEK 2: Routes + Export + Dashboard Cleanup

Current State: Sign-up component EXISTS but not in routes.js | Billing component EXISTS but not in routes.js | Export buttons are stubs on Orders + Customers | Dashboard has 2 hardcoded widgets (SatisfactionRate 95%, ReferralTracking) | barChartDataDashboard has hardcoded sales data (not used, real data used instead)

Yousef - Image Upload + Form Validation + Polish

#	Task	Files to Create / Modify
1	Add image upload section to ProductForm: drag-and-drop zone, preview thumbnails, reorder images, delete image, max 5 images, max 5MB each	src/layouts/products/components/ProductForm/ImageUpload.js, src/layouts/products/components/ProductForm/index.js (modify)
2	Add form validation to ProductForm: required fields (name, price, status), price > 0, SKU format, MUI error states + helper text	src/layouts/products/components/ProductForm/validation.js, src/layouts/products/components/ProductForm/index.js (modify)
3	Add ConfirmDialog to product delete + order cancel: replace browser confirm() with ConfirmDialog in products list and order detail	src/layouts/products/index.js (modify), src/layouts/orders/detail/index.js (modify)
4	Integrate CSV export into Orders page: exportToCSV with columns (order#, customer, date, total, status, payment_method)	src/layouts/orders/index.js (modify)
5	Integrate CSV export into Customers page: exportToCSV with columns (name, email, phone, orders_count, total_spent, status)	src/layouts/customers/index.js (modify)
6	Add product routes to routes.js: /products/new -> ProductCreate, /products/:id/edit -> ProductEdit, /products/:id/duplicate -> ProductDuplicate	src/routes.js (modify)
7	Add loading skeletons to ProductForm, OrderDetail, CustomerDetail for better UX during data fetch	src/layouts/products/components/ProductForm/Skeleton.js, src/layouts/orders/detail/Skeleton.js, src/layouts/customers/detail/Skeleton.js
8	Write integration smoke tests: product CRUD flow (create -> edit -> duplicate -> delete), snackbar appears, confirm dialog works	src/__tests__/products.test.js, src/__tests__/snackbar.test.js

Yahia - Routes + Dashboard Cleanup

#	Task	Files to Create / Modify
1	Fix Sign-Up route: add /authentication/sign-up to routes.js (component exists at src/layouts/authentication/sign-up/)	src/routes.js (modify)
2	Fix Billing route: add /billing to routes.js + add to sidenav (component exists in src/layouts/billing/)	src/routes.js (modify), src/examples/Sidenav/index.js (modify)
3	Add order/customer detail routes: /orders/:id -> OrderDetail, /customers/:id -> CustomerDetail, /customers/new -> CustomerCreate	src/routes.js (modify)

#	Task	Files to Create / Modify
4	Replace SatisfactionRate hardcoded 95% with real data: compute from order ratings or customer feedback API (or hide if no data)	src/layouts/dashboard/components/SatisfactionRate/index.js (modify)
5	Replace ReferralTracking hardcoded data with real data: use actual merchant invite count from API or replace with useful widget (e.g. conversion rate)	src/layouts/dashboard/components/ReferralTracking/index.js (modify)
6	Clean up barChartDataDashboard mock: remove hardcoded file, audit all dashboard imports to confirm real API data is used everywhere	src/layouts/dashboard/data/barChartData.js (delete), src/layouts/dashboard/index.js (audit)
7	Add empty states for all list pages: Products (no products yet), Orders (no orders), Customers (no customers) with call-to-action buttons	src/layouts/products/components/EmptyState.js, src/layouts/orders/components/EmptyState.js, src/layouts/customers/components/EmptyState.js
8	Write integration tests: route navigation (sign-up, billing, order detail), dashboard renders without mock data, empty states render	src/__tests__/routes.test.js, src/__tests__/dashboard.test.js

PR Dependency Order (No Conflicts)

Frontend PRs use FE- prefix. File scope shows which layout/component each PR touches - no overlap between Yousef & Yahia.

Week 1 PRs: Product CRUD + Global Feedback

PR	PR Name	Depends On	Owner	Files Touched
#FE-1	feat: SnackbarProvider context + GlobalSnackbar component	None (foundation)	Yousef	context/, components/
#FE-2	refactor: replace all window.alert() with useSnackbar()	PR #FE-1		sign-up, products, profile
#FE-3	feat: reusable ConfirmDialog component	None (independent)	Yousef	components/
#FE-4	feat: CSV export utility (exportToCSV)	None (independent)	Yousef	utils/
#FE-5	feat: ProductForm component (full form with all sections)	PR #FE-1	Yousef	layouts/products/comp/
#FE-6	feat: ProductCreate + ProductEdit + ProductDuplicate pages	PR #FE-5	Yousef	layouts/products/
#FE-7	feat: OrderDetail page (header, line items, pricing, shipping, payment, notes, status updater)	PR #FE-1	Yahia	layouts/orders/detail/
#FE-8	feat: CustomerDetail page (info, stats, order history)	PR #FE-1	Yahia	layouts/customers/detail/
#FE-9	feat: CustomerCreate form	PR #FE-1	Yahia	layouts/customers/create/
#FE-10	feat: wire Order 'View' + Customer click to detail pages	PR #FE-7, #FE-8	Yahia	layouts/orders/, customers/

Week 2 PRs: Routes + Export + Dashboard Cleanup

PR	PR Name	Depends On	Owner	Files Touched
#FE-11	feat: image upload + drag-and-drop in ProductForm	PR #FE-5	Yousef	products/comp/ImageUpload
#FE-12	feat: form validation + MUI error states in ProductForm	PR #FE-5	Yousef	products/comp/validation
#FE-13	feat: ConfirmDialog in product delete + order cancel	PR #FE-3, #FE-6, #FE-7	Yousef	products/, orders/detail
#FE-14	feat: CSV export on Orders + Customers pages	PR #FE-4	Yousef	orders/, customers/
#FE-15	feat: add product routes (/new, /:id/edit, /:id/duplicate)	PR #FE-6	Yousef	routes.js
#FE-16	fix: add Sign-Up + Billing routes + sidenav entry	None (independent)	Yahia	routes.js, Sidenav/
#FE-17	fix: replace SatisfactionRate + ReferralTracking mock data	None (independent)	Yahia	dashboard/components/
#FE-18	chore: delete barChartDataDashboard mock + audit dashboard	None (independent)	Yahia	dashboard/data/, dashboard/
#FE-19	feat: add order/customer detail + create routes	PR #FE-7, #FE-8, #FE-9	Yahia	routes.js
#FE-20	feat: empty states for Products, Orders, Customers lists	None (independent)	Yahia	layouts/*/components/
#FE-21	feat: loading skeletons for ProductForm, OrderDetail, CustomerDetail	PR #FE-5, #FE-7, #FE-8	Yousef	layouts/*/Skeleton.js
#FE-22	test: product CRUD + snackbar + routes + dashboard + empty states	PR #FE-6, #FE-19, #FE-20	Both	__tests__/_/

Parallel Work Timeline

Week 1:

Yousef:

[FE-1 Snackbar] --> [FE-2 Replace alerts] --> [FE-3 ConfirmDialog] --> [FE-4 CSV] --> [FE-5 ProductForm] --> [FE-6 CRUD pages]

Day 1 Day 1 Day 2 Day 2 Day 3-4 Day 5

Yahia:

wait FE-1... --> [FE-7 OrderDetail (3 days)] -----> [FE-8 CustomerDetail] --> [FE-9 CustCreate] --> [FE-10 Wiring]
Day 1-3 Day 3-4 Day 4 Day 5

Week 2:

Yousef:

[FE-11 ImgUpload] --> [FE-12 Validation] --> [FE-13 ConfirmDlg] --> [FE-14 CSV Export] --> [FE-15 Routes] --> [FE-21 Skeletons]
Day 1 Day 2 Day 2 Day 3 Day 3 Day 4-5

Yahia:

[FE-16 SignUp+Billing] --> [FE-17 SatisfRate] --> [FE-18 MockClean] --> [FE-19 Routes] --> [FE-20 EmptyStates] --> [FE-22 Tests]
Day 1 Day 1 Day 2 Day 3 Day 3-4 Day 5

Conflict-Free File Ownership Map

Yousef Owns (exclusive)	Yahia Owns (exclusive)
src/context/SnackbarContext.js	src/layouts/orders/detail/ (entire dir)
src/components/GlobalSnackbar/	src/layouts/orders/detail/components/
src/components/ConfirmDialog/	src/layouts/customers/detail/ (entire dir)
src/utls/exportCSV.js	src/layouts/customers/create/
src/layouts/products/components/ProductForm/	src/layouts/customers/detail/components/
src/layouts/products/create/	src/layouts/dashboard/components/SatisfactionRate/
src/layouts/products/edit/	src/layouts/dashboard/components/ReferralTracking/
src/layouts/products/duplicate/	src/layouts/dashboard/data/barChartData.js
src/ __tests__ /products.test.js	src/layouts/orders/components/EmptyState.js
src/ __tests__ /snackbar.test.js	src/layouts/customers/components/EmptyState.js

Shared Files (merge sequentially):

- src/App.js - Yousef wraps with SnackbarProvider (FE-1). Done first, Yahia never touches it.
- src/routes.js - Yousef adds product routes (FE-15, Day 3). Yahia adds sign-up/billing/detail routes (FE-16 Day 1, FE-19 Day 3). Merge FE-16 first, then FE-15 rebases.
- src/layouts/products/index.js - Yousef modifies (FE-2 alerts, FE-4 export, FE-13 confirm). All Yousef's PRs. No conflict.
- src/layouts/orders/index.js - Yahia modifies 'View' button (FE-10). Yousef adds CSV export (FE-14). FE-10 merges first, FE-14 rebases.
- src/layouts/customers/index.js - Yahia modifies click handler (FE-10). Yousef adds CSV export (FE-14). FE-10 merges first, FE-14 rebases.
- src/examples/Sidenav/ - Only Yahia touches this (FE-16). No conflict.
